SanerNow Compliance Management

SanerNow – Your 'OS' for managing and securing endpoints

Today's Reality

- Regulatory audits expose non-compliant security processes

- Financial penalties for non-compliance continue to rise

- Organizational configuration compliance is difficult and costly to manage

The Challenge

The security industry increasingly faces new regulations and companies have limited resources to dedicate to compliance. The regulatory burden can be overwhelming, resulting in ad hoc solutions.

Companies must produce compliance reports to demonstrate that security measures will protect them from being compromised.

The Solution

SanerNow Compliance Management (CM) is a cloud-delivered service that continuously monitors endpoints to discover deviations from established internal configuration policies and regulatory requirements. It reports and remediates configuration deviations. Organizational benchmarks can be customized to meet internal requirements.

SanerNow supports regulatory standards such as PCI, HIPAA, NIST 800-53 and NIST 800-171.

Key Benefits

☑ **Compliant endpoints – Any device, any time**
- Highlights and manages areas of risk
- Provides transparency of endpoint activities

☑ **Protected reputation**
- Ensures compliance benchmarks are met
- Fixes configuration deviations

☑ **Reduced costs**
- Decreases costs of meeting regulatory compliance requirements

SanerNow Compliance Management

Key Features & Capabilities

☑ Use out-of-the-box compliance reports for PCI DSS , HIPAA, NIST–800–171

☑ Customize organization configuration benchmarks

☑ Track critical events associated with account management, privileged user accounts, the network file system, and user logon and logoff activities

☑ Automatically detect and fix configuration deviations

☑ Include controls from vulnerability, patch, asset and endpoint management tools

☑ Get compliance reports in multiple formats - HTML, PDF or CSV

☑ Get real-time email alerts for deviations

☑ Schedule the compliance reports to run periodically, and get them emailed to multiple administrators
